

Question #1 of 76

Question ID: 1457754

Felker Inc. owns a piece of specialized machinery. The original cost of the machinery was \$500,000 and to date it has accumulated depreciation of \$140,000. Which of the following will Felker recognize on its income statement if it sells the machinery for \$400,000?

- A)** Loss of \$100,000.
 - B)** Gain of \$40,000.
 - C)** Loss of \$360,000.
-

Question #2 of 76

Question ID: 1457701

Capitalizing interest costs related to a company's construction of assets for its own use is *required* by:

- A)** U.S. GAAP only.
 - B)** both IFRS and U.S. GAAP.
 - C)** IFRS only.
-

Question #3 of 76

Question ID: 1457736

La Crosse Partners LLC has a franchise agreement with Arnolds Crispy Fry that expires in seven years, but is renewable at each expiration date for a nominal fee. If the franchise agreement is initially valued at \$60,000:

- A)** amortization expense in the first year will be one-seventh of \$60,000.
 - B)** an accelerated amortization method is more appropriate than the straight-line method.
 - C)** amortization expense in the sixth year will be zero.
-

Question #4 of 76

Question ID: 1457744

Dubois Company bought land for company use five years ago for €2 million and presents its balance sheet value as €2.2 million. If the fair value of the land decreases to €1.8 million, Dubois will:

- A)** recognize a loss of €400,000 and decrease shareholders' equity by €200,000.
 - B)** decrease shareholders' equity by €400,000 but will not recognize a loss.
 - C)** recognize a loss of €200,000 and decrease shareholders' equity by €400,000.
-

Question #5 of 76

Question ID: 1457771

Under IFRS, if a firm reports investment property using the fair value model, unrealized gains and losses on investment property are:

- A)** disclosed in the financial statement notes.
 - B)** recognized in other comprehensive income.
 - C)** recognized on the income statement.
-

Question #6 of 76

Question ID: 1457702

Which of the following items is *least likely* an example of an intangible asset with an indefinite life?

- A)** Acquired patents.
 - B)** Goodwill.
 - C)** Trademarks that can be renewed at minimal cost.
-

Question #7 of 76

Question ID: 1457711

Compared with firms that expense costs, firms that capitalize costs can be expected to report:

- A)** higher asset levels and higher equity levels in the early years of the asset's life.

- B)** higher asset levels and lower equity levels in the early years of the asset's life.
 - C)** lower asset levels and higher equity levels in the early years of the asset's life.
-

Question #8 of 76

Question ID: 1457729

In the early years of an asset's life, a firm that chooses an accelerated depreciation method instead of using straight-line depreciation will tend to have:

- A)** lower net income and lower equity.
 - B)** higher return on equity and higher return on assets.
 - C)** lower depreciation expense and lower turnover ratios.
-

Question #9 of 76

Question ID: 1457735

Stannum Records obtains two intangible assets in a business acquisition: legal rights to reproduce songs, valued at \$5 million, and a trademark valued at \$1 million. The trademark expires in 10 years and can be renewed at a minimal cost. Stannum estimates a 5-year useful life for the song rights. Because much of the songs' economic value is realized in their early years, Stannum uses double-declining balance amortization. Amortization expense in the first year after the acquisition is *closest* to:

- A)** \$2.1 million.
 - B)** \$2.0 million.
 - C)** \$2.2 million.
-

Question #10 of 76

Question ID: 1457740

The *most likely* result of increasing the estimated useful life of a depreciable asset is that:

- A)** asset turnover will increase.
- B)** net profit margin will increase.
- C)** return on assets will decrease.

Question #11 of 76

Question ID: 1457747

Under U.S. GAAP, an asset is impaired when:

- A)** accumulated depreciation plus salvage value exceeds acquisition costs.
 - B)** the firm can no longer fully recover the carrying amount of the asset.
 - C)** the present value of future cash flows exceeds the carrying amount of the asset.
-

Question #12 of 76

Question ID: 1457763

Lucille Edgewater, CFA, is analyzing Pfaff Company, which reports its long-lived assets using the revaluation model. Edgewater needs to determine 1) what Pfaff's carrying value of property, plant and equipment would be under the historical cost model, and 2) which of Pfaff's intangible assets have finite useful lives. Will these items be disclosed in Pfaff's financial statements?

- A)** Neither of these items is required to be disclosed.
 - B)** Only one of these items is required to be disclosed.
 - C)** Both of these items are required to be disclosed.
-

Question #13 of 76

Question ID: 1457745

Vasco Ltd. purchased a unit of heavy equipment one year ago for £500,000 and capitalized it as a long-lived asset. Because demand for equipment of this type has grown significantly, Vasco believes the fair value of its equipment has increased to £600,000. If Vasco revalues its equipment to £600,000, what will be the most likely effect on Vasco's financial results, compared to not revaluing the equipment?

- A)** The debt-to-equity ratio will be unaffected by the revaluation.
 - B)** Net income will be higher in the period of the revaluation.
 - C)** Net income will be lower in the periods following the revaluation.
-

Question #14 of 76

Question ID: 1457741

For a firm to use the revaluation model for balance sheet reporting of long-lived assets:

- A)** an active market must exist for the assets.
 - B)** the firm must report under U.S. GAAP.
 - C)** the firm must choose which assets of each type to revalue, and which to report at cost.
-

Question #15 of 76

Question ID: 1457773

A firm acquires investment property for €3 million and chooses the fair value model for financial reporting. In Year 1 the market value of the investment property decreases by €150,000. In Year 2 the market value of the investment property increases by €200,000. On its financial statements for Year 2, the firm will recognize a:

- A)** €200,000 gain on its income statement.
 - B)** €150,000 increase in shareholders' equity.
 - C)** €150,000 gain on its income statement and a €50,000 revaluation surplus in shareholders' equity.
-

Question #16 of 76

Question ID: 1457767

The average age of a firm's property, plant, and equipment can be estimated by dividing:

- A)** accumulated depreciation by depreciation expense.
 - B)** gross PP&E by depreciation expense.
 - C)** net PP&E by depreciation expense.
-

Question #17 of 76

Question ID: 1462845

A company that capitalizes costs instead of expensing them will have:

- A) lower cash flows from investing and lower income variability.
 - B) lower cash flows from operations and higher profitability in early years.
 - C) higher income variability and higher cash flows from operations.
-

Question #18 of 76

Question ID: 1457742

Davis Inc. is a large manufacturing company operating in several European countries. Davis has long-lived assets that are valued on the balance sheet at \$600 million. This includes previously recognized revaluation losses of \$80 million. In the most recent accounting period, the fair value of these assets in an active market is \$690 million. Which of the following entries will Davis record under the IFRS revaluation model?

- A) Gain on income statement and a revaluation surplus.
 - B) Gain on income statement only.
 - C) Revaluation surplus only.
-

Question #19 of 76

Question ID: 1457760

An impairment write-down is *least likely* to decrease a company's:

- A) future depreciation expense.
 - B) debt-to-equity ratio.
 - C) assets.
-

Question #20 of 76

Question ID: 1457737

A company acquires an intangible asset for \$100,000 and expects it to have a value of \$20,000 at the end of its 5-year useful life. If the company amortizes the asset using the double-declining balance method, amortization expense in year 4 of the asset's useful life is *closest* to:

- A) \$1,600.

B) \$6,910.

C) \$8,640.

Question #21 of 76

Question ID: 1457719

Walsh Furniture has purchased a machine with a 7-year useful life for \$250,000. At the end of its life it will have an estimated salvage value of \$15,000. Using the double-declining balance (DDB) method, depreciation expense in year 2 is *closest* to:

A) \$51,020.

B) \$58,750.

C) \$71,430.

Question #22 of 76

Question ID: 1457756

Spenser Inc. owns a piece of specialized machinery with a current fair value of \$400,000. The original cost of the machinery was \$500,000 and to date has generated accumulated depreciation of \$140,000. Which of the following must Spenser record on the income statement if it decides to abandon the asset?

A) Gain of \$40,000.

B) Loss of \$100,000.

C) Loss of \$360,000.

Question #23 of 76

Question ID: 1457762

Which set of accounting standards requires firms to disclose estimated amortization expense for the next five years on intangible assets?

A) Both IFRS and U.S. GAAP.

B) IFRS.

C) U.S. GAAP.

Question #24 of 76

Question ID: 1457753

The *most likely* effects of taking an impairment charge in the current period on an intangible asset with a remaining life of five years would be to:

- A)** increase the debt-to-equity ratio and decrease the long-term asset turnover ratio.
 - B)** reduce net income in the current period and increase it in future periods.
 - C)** reduce pretax income and accumulated amortization in the current period.
-

Question #25 of 76

Question ID: 1457748

U.S. GAAP *least likely* requires property, plant, and equipment to be tested for impairment:

- A)** at least annually.
 - B)** when an asset is reclassified as held-for-sale.
 - C)** when events indicate the firm may not recover the asset's carrying value.
-

Question #26 of 76

Question ID: 1457761

Taking an impairment of long-lived assets will result in:

- A)** higher deferred tax liabilities.
 - B)** higher future return on assets.
 - C)** a lower debt-to-equity ratio.
-

Question #27 of 76

Question ID: 1457774

A building owned by a firm is *most likely* to be classified as investment property if:

- A)** space in the building is rented to other firms.
- B)** the firm uses the building for its corporate headquarters.

C) the building is a manufacturing plant or distribution center.

Question #28 of 76

Question ID: 1457766

A reconciliation of beginning and ending carrying values for each class of property, plant, and equipment is required for firms reporting under:

- A) both U.S. GAAP and IFRS.
 - B) U.S. GAAP.
 - C) IFRS.
-

Question #29 of 76

Question ID: 1462844

When comparing the financial statement effects of expensing versus capitalizing an expenditure, capitalizing will *most likely* result in which of the following effects in the years after the expenditure is incurred?

- A) Lower net income and higher return on assets.
 - B) Higher net income and lower return on assets.
 - C) Lower net income and lower return on assets.
-

Question #30 of 76

Question ID: 1457765

In accounting for PP&E using the cost model, companies are required to disclose both gross asset value and accumulated depreciation under:

- A) both IFRS and U.S. GAAP.
 - B) IFRS but not U.S. GAAP.
 - C) U.S. GAAP but not IFRS.
-

Question #31 of 76

Intangible assets with finite useful lives are:

- A)** amortized over their actual lives.
 - B)** amortized over their expected useful lives.
 - C)** not amortized, but are tested for impairment at least annually.
-

Question #32 of 76

Question ID: 1457758

Three years ago, Ranchero Corporation purchased equipment for a process used in production, for £3 million. At the end of last year, Ranchero determined the fair value of the equipment was greater than its book value. No impairment losses have been recognized on the equipment. Assuming Ranchero follows International Financial Reporting Standards, what is the impact on its total asset turnover ratio and return on equity of reporting the value of the equipment on the balance sheet at fair value?

- A)** Both will increase.
 - B)** Only one will increase.
 - C)** Both will decrease.
-

Question #33 of 76

Question ID: 1462849

Under U.S. GAAP, an asset is considered impaired if its book value is:

- A)** greater than the present value of its expected future cash flows.
 - B)** less than its market value.
 - C)** greater than the sum of its undiscounted expected cash flows.
-

Question #34 of 76

Question ID: 1457772

The revaluation model for investment property is permitted under:

- A)** neither IFRS nor U.S. GAAP.

- B)** IFRS, but not U.S. GAAP.
 - C)** both IFRS and U.S. GAAP.
-

Question #35 of 76

Question ID: 1457704

Mammoth, Inc. reports under U.S. GAAP. Mammoth has begun a long-term project to develop inventory control software for external sale. On its financial statements, Mammoth should:

- A)** capitalize all costs of this project.
 - B)** expense all costs of this project in the periods incurred.
 - C)** expense all costs of this project until technological feasibility has been established.
-

Question #36 of 76

Question ID: 1462850

Stone Development Company owns four office buildings and a tract of raw land. Stone occupies one of the buildings, collects rental income from the other three buildings, and is holding the land for capital appreciation. Under IFRS, which of these assets should Stone classify as investment property on its balance sheet?

- A)** The land and the buildings that generate rental income.
 - B)** Only the land held for capital appreciation.
 - C)** All of these assets.
-

Question #37 of 76

Question ID: 1457728

A company is switching from straight-line depreciation to an accelerated method of depreciation. Assuming all other revenue and expenses are at the same levels for the next period, switching to an accelerated method will *most likely* increase the company's:

- A)** total assets on the balance sheet.
- B)** net income/sales ratio.

C) fixed asset turnover ratio.

Question #38 of 76

Question ID: 1457730

Accelerated depreciation methods for financial reporting are *most likely* to have which of the following effects on a company's financial ratios during the early years of an asset's life?

- A) Higher asset turnover ratio.
 - B) Lower debt-to-equity ratio.
 - C) Lower current ratio.
-

Question #39 of 76

Question ID: 1462846

After acquiring a subsidiary, Lafleur Company adds to its balance sheet a patent that expires in five years and a trademark that can be renewed every three years. Lafleur should amortize:

- A) the patent over five years and the trademark over three years.
 - B) the patent over five years, but should not amortize the trademark.
 - C) neither the patent nor the trademark, but must test them for impairment annually.
-

Question #40 of 76

Question ID: 1457749

An analyst determined the following information concerning Franklin, Inc.'s stamping machine:

- Acquired seven years ago for \$22 million
- Straight line method used for depreciation
- Useful life estimated to be 12 years
- Salvage value originally estimated to be \$4 million

The stamping machine is expected to generate \$1,500,000 per year for five more years and will then be sold for \$1,000,000. Under U.S. GAAP, the stamping machine is:

- A) not impaired.
 - B) impaired because its carrying value exceeds expected future cash flows.
 - C) impaired because expected salvage value has declined.
-

Question #41 of 76

Question ID: 1457739

Lakeside Co. recently determined that one of its processing machines has become obsolete after 7 years of use and, unexpectedly, has no salvage value. The machine was being depreciated over a useful economic life of 10 years. Which of the following statements is *most* consistent with this discovery?

- A) Historically, economic depreciation was overstated in the financial statements.
 - B) Historically, economic depreciation was understated in the financial statements.
 - C) Lakeside Co. will owe back taxes.
-

Question #42 of 76

Question ID: 1457716

Compared to expensing, capitalizing costs will *most likely* result in:

- A) lower returns on assets in the period of capitalization.
 - B) lower debt-to-equity ratios.
 - C) higher net cash flows.
-

Question #43 of 76

Question ID: 1462843

Which of these intangible assets is *most likely* to be amortized?

- A) Purchased patent that will expire in the current period.
 - B) Internally developed trademark with a useful life of 20 years.
 - C) Purchased franchise right with a useful life of two years.
-

Question #44 of 76

Question ID: 1457743

On January 1, 20X4, Cayman Corporation bought manufacturing equipment for \$30 million. On December 31, 20X6, Cayman determined the equipment was impaired and recognized a \$5 million impairment loss in its income statement. As of December 31, 20X7, the fair value of the equipment exceeded the book value by \$7 million. Cayman may recognize a gain in its 20X7 income statement if it reports under:

- A)** either IFRS or U.S. GAAP.
 - B)** IFRS, but not U.S. GAAP.
 - C)** neither IFRS nor U.S. GAAP.
-

Question #45 of 76

Question ID: 1457712

Meyer Investment Advisory and Smith Brothers Investments are operationally identical except that Meyer capitalizes some costs that Smith expenses. Compared to Smith, Meyer is likely to have:

- A)** higher debt/equity ratio and higher debt/assets ratio.
 - B)** higher cash flows from operations and lower cash flow from investing.
 - C)** lower profitability (ROA and ROE) in early years and higher in later years.
-

Question #46 of 76

Question ID: 1457757

A firm revalues its long-lived assets upward. All other things equal, which of the following financial impacts is *least likely* to occur?

- A)** Higher earnings in the revaluation period.
 - B)** Higher profitability in the periods after revaluation.
 - C)** Lower solvency ratios.
-

Question #47 of 76

Question ID: 1457720

Novak, Inc. owns equipment with a historical cost of \$20,000, a useful life of 5 years, and an estimated salvage value of \$5,000. Using the double declining balance method, depreciation expense in Year 3 for this equipment is:

- A)** \$3,000.00.
 - B)** \$2,880.00.
 - C)** \$2,200.00.
-

Question #48 of 76

Question ID: 1457775

A manufacturing firm shuts down production at one of its plants and offers the facility for rent. Based on the market for similar properties, the firm determines that the fair value of the plant is €500,000 more than its carrying value. If this firm uses the cost model for plant and equipment and the fair value model for investment property, should it recognize a gain on its income statement?

- A)** No, because the firm must continue to use the cost model for valuation of this asset.
 - B)** Yes, because the plant will be reclassified as investment property.
 - C)** No, because the increase in value does not reverse a previously recognized loss.
-

Question #49 of 76

Question ID: 1457724

This information pertains to equipment owned by Brigade Company.

- Cost of equipment: \$10,000.
- Estimated residual value: \$2,000.
- Estimated useful life: 5 years.
- Depreciation method: straight-line.

The accumulated depreciation at the end of year 3 is:

- A)** \$1,600.
- B)** \$4,800.
- C)** \$5,200.

Question #50 of 76

Question ID: 1462847

Clampet Ltd. reports under IFRS and reports certain assets on its balance sheet using the revaluation model. Machinery purchased in 20X1 for £22,000 is revalued to £20,000 at the end of 20X2. At the end of 20X3, the fair value of the asset is £23,000. The *most likely* effect of the change in value to £23,000 is to:

- A)** increase EBIT by £3,000.
 - B)** increase EBIT by £2,000.
 - C)** leave EBIT unchanged.
-

Question #51 of 76

Question ID: 1457713

Which of the following statements regarding capitalizing versus expensing costs is *least accurate*?

- A)** Capitalization results in higher profitability initially.
 - B)** Cash flow from investing is higher with expensing than with capitalization.
 - C)** Total cash flow is higher with capitalization than expensing.
-

Question #52 of 76

Question ID: 1457733

Under normal circumstances, intangible assets with indefinite lives are:

- A)** amortized over a period specified in the accounting standards.
 - B)** not amortized.
 - C)** amortized over a period chosen by management.
-

Question #53 of 76

Question ID: 1457731

Which of the following statements about the role of depreciable lives and salvage values in the computation of depreciation expenses for financial reporting is *most accurate*?

- A) Companies are specifically required to disclose data about estimated salvage values in the footnotes to the financial statements.
 - B) Depreciable lives and salvage values are chosen by management and allow for the possibility of income manipulation.
 - C) The estimated useful life of the same depreciable asset should be the same regardless of which company owns the asset.
-

Question #54 of 76

Question ID: 1457764

For impaired long-lived assets, a firm reporting under IFRS is *least likely* required to disclose the:

- A) estimated probabilities of reversing impairment losses.
 - B) amounts of impairment losses and reversals by asset class.
 - C) circumstances that caused the impairment losses or reversals.
-

Question #55 of 76

Question ID: 1457770

An IFRS-reporting firm reclassifies a building it owns from "owner-occupied" to "investment property." The fair value of the building is greater than its carrying value. Under the fair value model for investment property, the firm will recognize a gain:

- A) only if it reverses a previously recognized loss.
 - B) equal to the difference between fair value and carrying value.
 - C) in other comprehensive income but not on the income statement.
-

Question #56 of 76

Question ID: 1457705

Varin, Inc. purchases franchise rights with an estimated useful life of ten years and a trademark that can be renewed every five years for a nominal fee. Under IFRS, Varin will recognize amortization expense on:

- A)** only one of these assets.
 - B)** neither of these assets.
 - C)** both of these assets.
-

Question #57 of 76

Question ID: 1457717

On January 1, 2004, JME purchased a truck that cost \$24,000. The truck had an estimated useful life of 5 years and \$4,000 salvage value. The amount of depreciation expense recognized in 2006 assuming that JME uses the double declining balance method is:

- A)** \$3,456.
 - B)** \$4,000.
 - C)** \$5,760.
-

Question #58 of 76

Question ID: 1457709

Train, Inc.'s cash flow from operations (CFO) in 20X8 was \$14 million. Train paid \$8 million cash to acquire a franchise at the beginning of 20X8 and recognized the entire purchase price as an expense. If Train had instead elected to amortize the cost of the franchise over its estimated life, 20X8 cash flow from operations (CFO) would have been:

- A)** \$14 million.
 - B)** \$6 million.
 - C)** \$22 million.
-

Question #59 of 76

Question ID: 1457718

JME acquired an asset on January 1, 2004, for \$60,000 cash. At that time JME estimated the asset would last 10 years and have no salvage. During 2006 JME estimated the remaining life of the asset to be only three more years with a salvage value of \$3,000. If JME uses straight line depreciation, what is the depreciation expense for 2006?

- A) \$6,000.
 - B) \$12,000.
 - C) \$15,000.
-

Question #60 of 76

Question ID: 1457769

An analyst will *most likely* use the average age of depreciable assets to estimate the company's:

- A) cash flows.
 - B) earnings potential.
 - C) near-term financing requirements.
-

Question #61 of 76

Question ID: 1457710

Compared to firms that expense costs, firms that capitalize expenses will have:

- A) higher leverage ratios.
 - B) lower cash flow from operations.
 - C) lower variability of income.
-

Question #62 of 76

Question ID: 1457714

Capitalized interest costs are typically reported in the cash flow statement as an outflow from:

- A) financing.
- B) investing.

C) operating.

Question #63 of 76

Question ID: 1457727

Which of the following statements comparing straight-line depreciation methods to alternative depreciation methods is *least accurate*? Companies that use:

- A) accelerated depreciation methods for tax purposes will decrease the amount of taxes paid in early years.
 - B) accelerated depreciation methods will have lower asset turnover ratios than if they used straight line depreciation.
 - C) straight-line depreciation methods will have higher book values for the assets on the balance sheet than companies that use accelerated depreciation.
-

Question #64 of 76

Question ID: 1457722

Component depreciation is required under:

- A) U.S. GAAP, but not IFRS.
 - B) both IFRS and U.S. GAAP.
 - C) IFRS, but not U.S. GAAP.
-

Question #65 of 76

Question ID: 1457726

Blocher Company is evaluating the following methods of accounting for depreciation of long-lived assets and inventory:

- Depreciation: straight-line; double-declining balance (DDB)
- Inventory: first in, first out (FIFO); last in, first out (LIFO)

Assuming a deflationary environment (prices are falling), which of the following combinations will result in the highest net income in year 1?

- A) DDB; FIFO.

B) Straight-line; FIFO.

C) Straight-line; LIFO.

Question #66 of 76

Question ID: 1457734

Schubert, Inc. acquires 100% of another firm. As a result of the acquisition, Schubert reports on its balance sheet 1) a patent with five years remaining and a carrying value of \$2 million and 2) goodwill with a carrying value of \$4 million. Using the straight-line method, total amortization expense in the first year for these two intangible assets is:

A) \$800,000.

B) \$400,000.

C) \$1,200,000.

Question #67 of 76

Question ID: 1457755

For a firm that uses the cost basis for valuing its long-lived assets, fair value is a consideration when calculating a gain or loss on:

A) abandoning an asset.

B) exchanging an asset.

C) selling an asset.

Question #68 of 76

Question ID: 1457708

Selected information from the financial statements of Salvo Company for the years ended December 31, 20X3 and 20X4 is as follows (in \$ millions):

	20X3	20X4
Sales	\$21	\$23
Cost of Goods Sold	(8)	(9)
Gross Profit	13	14
Cost of Franchise	(6)	0
Other Expenses	(6)	(6)
Net Income	\$1	\$8
Cash	\$4	\$5
Accounts Receivable	6	5
Inventory	9	7
Property, Plant & Equip. (net)	12	15
Total Assets	\$31	\$32
Accounts Payable	\$7	\$5
Long-term Debt	10	5
Common Stock	8	8

Retained Earnings 6 14

Total Liabilities and Equity \$31 \$32

If Salvo had amortized the cost of the franchise acquired in 20X3 over six years instead of expensing it, Salvo's return on average total equity for 20X4 would have been *closest* to:

- A) 35.6%.
 - B) 38.9%.
 - C) 31.1%.
-

Question #69 of 76

Question ID: 1457759

Marcel Inc. is a large manufacturing company based in the U.S. but also operating in several European countries. Marcel has long-lived assets currently in use that are valued on the balance sheet at \$600 million. This includes previously recognized impairment losses of \$80 million. The original cost of the assets was \$750 million. The fair value of the assets was determined in a professional appraisal to be \$690 million. Assuming that Marcel reports under U.S. GAAP, the new appraisal of the assets' value most likely results in:

- A) a \$90 million gain in other comprehensive income.
 - B) an \$80 million gain on income statement and \$10 million gain in other comprehensive income.
 - C) no change to Marcel's financial statements.
