

Question #1 of 25

Question ID: 1457192

An analyst who wants to examine a firm's financing transactions during the most recent period is *most likely* to evaluate the firm's statement of:

- A) comprehensive income.
- B) financial position.
- C) cash flows.

Explanation

The statement of cash flows describes a firm's inflows and outflows of cash during a reporting period from operating, investing, and financing activities. Financing transactions such as issuance of debt or stock are shown on the statement of cash flows. The statement of financial position (balance sheet) presents the firm's assets, liabilities, and equity at a point in time. The statement of comprehensive income (income statement) does not directly reflect a firm's financing transactions. Cash raised is not included in a firm's revenues and dividends paid and debt principal repaid are not included in its expenses.

(Module 16.1, LOS 16.b)

Question #2 of 25

Question ID: 1457197

The standard auditor's report is *most likely* required to:

- A) provide an "unqualified" opinion if material uncertainties exist.
- B) provide reasonable assurance that the financial statements contain no material errors.
- C) provide reasonable assurance that management is reliable.

Explanation

The standard auditor's report contains three parts:

1. The financial statements are prepared by management and are their responsibility and the auditor has performed an independent review.
2. The audit was conducted using generally accepted auditing standards, which provides reasonable assurance that there are no material errors in the financial statements.
3. The auditor is satisfied the statements were prepared in accordance with accepted accounting principles, and the principles chosen and estimates are reasonable.

Under U.S. GAAP, the auditor is required to state an opinion on the company's internal controls. The auditor may add this opinion as a fourth element of the auditor's report or provide it separately.

(Module 16.2, LOS 16.d)

Question #3 of 25

Question ID: 1457191

Which financial statement reports information about a company's financial position at a single point in time?

- A)** income statement.
- B)** cash flow statement.
- C)** balance sheet.

Explanation

The balance sheet reports a company's financial position at a point in time. In contrast, the income statement and the cash flow statement report a company's financial performance over a reporting period.

(Module 16.1, LOS 16.b)

Question #4 of 25

Question ID: 1457195

According to IFRS guidance for management's commentary, addressing the company's key relationships is:

- A)** neither recommended nor required.
- B)** required.
- C)** recommended.

Explanation

IFRS recommends that management commentary address the company's key relationships, resources, and risks, as well as the nature of the business, management's objectives, the company's past performance, and the performance measures used. Securities regulators may impose requirements for publicly traded firms to address certain topics in management's commentary, but accounting standards do not.

(Module 16.2, LOS 16.c)

Question #5 of 25

Question ID: 1457188

The role of financial statement analysis is *most accurately* described as:

- A) a common requirement for companies that are listed on public exchanges. 
- B) the use of information from a company's financial statements along with other information to make economic decisions regarding that company. 
- C) the reports and presentations a company uses to show its financial performance to investors, creditors, and other interested parties. 

Explanation

Financial statement analysis refers to the use of information from a company's financial statements along with other information to make economic decisions regarding that company. Financial reporting refers to the reports and presentations that a company uses to show its financial performance to investors, creditors, and other interested parties. Financial reporting is a requirement for companies that are listed on public exchanges.

(Module 16.1, LOS 16.a)

Question #6 of 25

Question ID: 1457193

Which of the following statements concerning the notes to the audited financial statements of a company is *least* accurate? Financial statement notes:

- A) include management's assessment of the company's operating performance and financial results. 
- B) are audited. 
- C) contain information about contingent losses that may occur. 

Explanation

Management's perspective on the company's results is provided in the Management's Discussion and Analysis supplement to the financial statements. Financial statement notes (footnotes) provide information about matters such as the company's accounting methods and assumptions, contingencies, and acquisitions and disposals. Footnotes to the financial statements are audited.

(Module 16.2, LOS 16.c)

Question #7 of 25

Question ID: 1457189

A company's operating revenues for a reporting period are *most likely* to be shown on its:

- A) balance sheet. 
- B) cash flow statement. 
- C) income statement. 

Explanation

Revenues for a reporting period are presented on a company's income statement. They can be, but are not required to be, classified as operating and nonoperating revenues. Cash from operating activities is presented on the company's statement of cash flows, but this is not necessarily equal to operating revenues because revenue might be recognized in a different period than cash is collected. The balance sheet displays a company's financial position at a fixed point in time.

(Module 16.1, LOS 16.b)

Question #8 of 25

Question ID: 1457187

According to the IASB, which of the following *least* accurately describes financial reporting?
Financial reporting:

- A) provides information about changes in financial position of an entity. 
- B) is useful to a wide range of users. 
- C) uses the information in a company's financial statements to make economic decisions. 

Explanation

The role of financial reporting is described by the International Accounting Standards Board (IASB) in its "Framework for the Preparation and Presentation of Financial Statements":

The objective of financial statements is to provide information about the financial position, performance and changes in financial position of an entity that is useful to a wide range of users in making economic decisions.

Using the information in a company's financial statements to make economic decisions is financial analysis, not financial reporting.

(Module 16.1, LOS 16.a)

Question #9 of 25

Question ID: 1457186

Which of the following is *least likely* to be considered a role of financial statement analysis?

- A) Assessing the management skill of the company's executives. 
- B) Determining whether to invest in the company's securities. 
- C) To make economic decisions. 

Explanation

The role of financial statement analysis is to use the information in a company's financial statements, along with other relevant information, to make economic decisions. Examples of such decisions include whether to invest in the company's securities or recommend them to other investors, or whether to extend trade or bank credit to the company. Although the financial statements might provide indirect evidence about the management skill of the company's executives, that is not generally considered the role of financial statement analysis.

(Module 16.1, LOS 16.a)

Question #10 of 25

Question ID: 1457184

Which of the following statements about financial statement analysis and reporting is *least* accurate?

- A) Financial statement analysis focuses on the way companies show their financial performance to investors by preparing and presenting financial statements. 
- B) Providing information about changes in a company's financial position is a role of financial reporting. 

- C) Deciding whether to recommend a company's securities to investors is a role of financial statement analysis.

Explanation

Financial reporting refers to the way companies show their financial performance to investors, creditors, and other interested parties by preparing and presenting financial statements, including information about changes in a company's financial position. The role of financial statement analysis is to use the information in a company's financial statements, along with other relevant information, to make economic decisions, such as whether to invest in the company's securities or recommend them to other investors. Analysts use financial statement data to evaluate a company's past performance and current financial position in order to form opinions about the company's ability to earn profits and generate cash flow in the future.

(Module 16.1, LOS 16.a)

Question #11 of 25

Question ID: 1457204

In addition to the audited financial statements included in a firm's annual report, which of the following sources of information is *most likely* to contain audited data?

- A) Footnotes to the annual financial statements.
- B) Management's commentary.
- C) Interim financial statements filed with the SEC.

Explanation

The footnotes are an integral part of the audited financial statements in a firm's annual report and are included in the audit opinion.

(Module 16.2, LOS 16.e)

Question #12 of 25

Question ID: 1457203

Which of the following is *least likely* to be available on EDGAR (Electronic Data Gathering, Analysis, and Retrieval System)?

- A) Corporate press releases.
- B) Form 10Q.
- C) SEC filings.

Explanation

Securities and Exchange Commission (SEC) filings are available from EDGAR (Electronic Data Gathering, Analysis, and Retrieval System, www.sec.gov). Companies' annual and quarterly financial statements are also filed with the SEC (Form 10-K and Form 10-Q, respectively).

(Module 16.2, LOS 16.e)

Question #13 of 25

Question ID: 1457196

For publicly traded firms in the United States, the Management Discussion and Analysis (MD&A) portion of the financial disclosure is *least likely* required to discuss:

- A) capital resources and liquidity.
- B) results of operations.
- C) unusual or infrequent items.

Explanation

For publicly traded U.S. firms, the MD&A portion of the financial disclosure is required to discuss results of operations, capital resources and liquidity and a general business overview based on known trends. A discussion of unusual or infrequent items may be included in the MD&A, but is not required.

(Module 16.2, LOS 16.c)

Question #14 of 25

Question ID: 1457190

Which of the following statements represents information at a specific point in time?

- A) The balance sheet.
- B) The income statement and the balance sheet.
- C) The income statement.

Explanation

The balance sheet represents information at a specific point in time. The income statement represents information over a period of time.

(Module 16.1, LOS 16.b)

Question #15 of 25

Question ID: 1457200

A firm's internal controls are *most accurately* described as:

- A)** directly affecting the firm's financial reporting quality.
- B)** outside the scope of an audit report under IFRS and U.S. GAAP.
- C)** a responsibility of the firm's board of directors.

**Explanation**

Weak internal controls provide an opportunity for low-quality or even fraudulent financial reporting. A firm's management, not its board of directors, is responsible for ensuring the effectiveness of a firm's internal controls. Under U.S. GAAP, auditors are required to state an opinion on a firm's internal controls.

(Module 16.2, LOS 16.d)

Question #16 of 25

Question ID: 1457206

The step in the financial statement analysis framework that includes making any appropriate adjustments to the financial statements and calculating ratios is *best* described as:

- A)** analyzing and interpreting the data.
- B)** gathering the data.
- C)** processing the data.

**Explanation**

The financial statement analysis framework consists of six steps:

1. *State the objective and context.* Determine what questions the analysis is meant to answer, the form in which it needs to be presented, and what resources and how much time are available to perform the analysis.
2. *Gather data.* Acquire the company's financial statements and other relevant data on its industry and the economy. Ask questions of the company's management, suppliers, and customers, and visit company sites.
3. *Process the data.* Make any appropriate adjustments to the financial statements. Calculate ratios. Prepare exhibits such as graphs and common-size balance sheets.
4. *Analyze and interpret the data.* Use the data to answer the questions stated in the first step. Decide what conclusions or recommendations the information supports.
5. *Report the conclusions or recommendations.* Prepare a report and communicate it to its intended audience. Be sure the report and its dissemination comply with the Code and Standards that relate to investment analysis and recommendations.
6. *Update the analysis.* Repeat these steps periodically and change the conclusions or recommendations when necessary.

(Module 16.2, LOS 16.f)

Question #17 of 25

Question ID: 1457194

Which of the following statements regarding footnotes to the financial statements is *least* accurate? Financial statement footnotes:

- A) may contain information regarding contingent losses. 
- B) provide information about assumptions and estimates used by management. 
- C) typically include a discussion of the firm's past performance and future outlook. 

Explanation

Discussion of a firm's past performance and future outlook is most likely to be found in management's commentary.

(Module 16.2, LOS 16.c)

Question #18 of 25

Question ID: 1457198

Which of the following would NOT require an explanatory paragraph added to the auditors' report?

- A) Doubt regarding the "going concern" assumption. 
- B) Uncertainty due to litigation. 
- C) Statements that the financial information was prepared according to GAAP. 

Explanation

The statements that the financial information was prepared according to GAAP should be included in the regular part of the auditors' report and not as an explanatory paragraph. The other information would be contained in explanatory paragraphs added to the auditors' report.

(Module 16.2, LOS 16.d)

Question #19 of 25

Question ID: 1457185

Which of the following *best* describes financial reporting and financial statement analysis?

- Financial reporting refers to how companies show their financial performance
- A) and financial analysis refers to using the information to make economic decisions. 
- Financial reports assess a company's past performance in order to draw
- B) conclusions about the company's ability to generate cash and profits in the future. 
- C) The objective of financial analysis is to provide information about the financial position of an entity that is useful to a wide range of users. 

Explanation

Financial reporting refers to the way companies show their financial performance to investors, creditors, and other interested parties by preparing and presenting financial statements. The objective of financial statements, not analysis, is to provide information about the financial position, performance and changes in financial position of an entity that is useful to a wide range of users in making economic decisions. The role of financial statement analysis, not reporting, is to use the information in a company's financial statements, along with other relevant information, to assess a company's past performance in order to draw conclusions about the company's ability to generate cash and profits in the future.

(Module 16.1, LOS 16.a)

Question #20 of 25

Question ID: 1457208

In the financial statement analysis framework, using the data to address the objectives of the analysis and deciding what conclusions or recommendations the information supports is *best* described as:

A) analyzing and interpreting the data.

B) processing the data.

C) reporting the conclusions.

Explanation

The financial statement analysis framework consists of six steps:

1. *State the objective and context.* Determine what questions the analysis is meant to answer, the form in which it needs to be presented, and what resources and how much time are available to perform the analysis.
2. *Gather data.* Acquire the company's financial statements and other relevant data on its industry and the economy. Ask questions of the company's management, suppliers, and customers, and visit company sites.
3. *Process the data.* Make any appropriate adjustments to the financial statements. Calculate ratios. Prepare exhibits such as graphs and common-size balance sheets.
4. *Analyze and interpret the data.* Use the data to answer the questions stated in the first step. Decide what conclusions or recommendations the information supports.
5. *Report the conclusions or recommendations.* Prepare a report and communicate it to its intended audience. Be sure the report and its dissemination comply with the Code and Standards that relate to investment analysis and recommendations.
6. *Update the analysis.* Repeat these steps periodically and change the conclusions or recommendations when necessary.

(Module 16.2, LOS 16.f)

Question #21 of 25

Question ID: 1457207

The step in the financial statement analysis framework of "processing the data" is *least likely* to include which activity?

A) Acquiring the company's financial statements.

B) Preparing exhibits such as graphs.

C) Making appropriate adjustments to the financial statements.

Explanation

The financial statement analysis framework consists of six steps. Step 2: "Gather data" includes acquiring the company's financial statements and other relevant data on its industry and the economy. Step 3. "Process the data" includes activities such as making any appropriate adjustments to the financial statements and preparing exhibits such as graphs and common-size balance sheets.

(Module 16.2, LOS 16.f)

Question #22 of 25

Question ID: 1457205

Which of the following is the *best* description of the financial statement analysis framework?

- A) Gather data, analyze and interpret the data, process the conclusions, assess the context, report the recommendations, update the analysis. 
- B) State the objective and context, gather data, process the data, analyze and interpret the data, report the conclusions or recommendations, update the analysis. 
- C) Gather data, analyze and interpret the data, determine the context, report the conclusions, update the analysis. 

Explanation

The financial statement analysis framework consists of six steps:

1. *State the objective and context.*
2. *Gather data.*
3. *Process the data.*
4. *Analyze and interpret the data.*
5. *Report the conclusions or recommendations.*
6. *Update the analysis.*

(Module 16.2, LOS 16.f)

Question #23 of 25

Question ID: 1457202

Which of the following is an analyst *least likely* to rely on as objective information to include in a company analysis?

- A) Corporate press releases. 
- B) Government agency statistical data on the economy and the company's industry. 
- C) Proxy statements. 

Explanation

Corporate reports and press releases are written by management and are often viewed as public relations or sales materials. An analyst should review information on the economy and the company's industry and compare the company to its competitors. This information can be acquired from sources such as trade journals, statistical reporting services, and government agencies. Securities and Exchange Commission (SEC) filings include Form 8-K, which a company must file to report events such as acquisitions and disposals of major assets or changes in its management or corporate governance and proxy statements, which are a good source of information about the election of (and qualifications of) board members, compensation, management qualifications, and the issuance of stock options.

(Module 16.2, LOS 16.e)

Question #24 of 25

Question ID: 1457199

Which of the following is an independent auditor *least likely* to do with respect to a company's financial statements?

- A) Confirm assets and liabilities contained in them.
- B) Prepare and accept responsibility for them.
- C) Provide an opinion concerning their fairness and reliability.

Explanation

Auditors make an independent review of financial statements, which are prepared by company management and are management's responsibility. It is the responsibility of auditors to confirm the assets, liabilities, and other items included in the statements and then issue an opinion concerning their fairness and reliability.

(Module 16.2, LOS 16.d)

Question #25 of 25

Question ID: 1457201

Which of the following statements about proxy statements is *least* accurate? Proxy statements are:

- A) not filed with the SEC.

B) a good source of information about the qualifications of board members and management.

C) available on the EDGAR web site.

Explanation

Proxy statements are issued to shareholders when there are matters that require a shareholder vote. These statements, which are also filed with the SEC and available from EDGAR, are a good source of information about the election of (and qualifications of) board members, compensation, management qualifications, and the issuance of stock options.

(Module 16.2, LOS 16.e)
