

### Question #1 of 32

Question ID: 1459045

Which of the following factors is *least likely* to affect an investor's risk tolerance?

- A) Level of insurance coverage.
  - B) Level of inflation in the economy.
  - C) Number of dependent family members.
- 

### Question #2 of 32

Question ID: 1459066

A firm that invests the majority of a portfolio to track a benchmark index, and uses active investment strategies for the remaining portion, is said to be using:

- A) a core-satellite approach.
  - B) risk budgeting.
  - C) strategic asset allocation.
- 

### Question #3 of 32

Question ID: 1459043

Which of the following statements about risk and return is *least accurate*?

- A) Return objectives may be stated in absolute terms.
  - B) Risk and return may be considered on a mutually exclusive basis.
  - C) Specifying investment objectives only in terms of return may expose an investor to inappropriately high levels of risk.
- 

### Question #4 of 32

Question ID: 1459040

The major components of a typical investment policy statement (IPS) *least likely* include:

- A) the investment manager's compensation.

**B)** investment objectives.

**C)** duties and responsibilities of the investment manager.

---

### Question #5 of 32

Question ID: 1459051

If an investor's ability to bear risk is low and willingness to bear risk is high, an investment manager should *most appropriately* consider the investor's overall financial risk tolerance to be:

**A)** moderate.

**B)** low.

**C)** high.

---

### Question #6 of 32

Question ID: 1459041

Which of the following would *least likely* be considered a minimum requirement of an IPS?  
A(n):

**A)** investment strategy based on client circumstances and constraints.

**B)** target return figure.

**C)** benchmark portfolio.

---

### Question #7 of 32

Question ID: 1459038

Which of the following is *not* necessarily included in an investment policy statement?

**A)** Procedures to update the IPS when circumstances change.

**B)** An investment strategy based on the investor's objectives and constraints.

**C)** A benchmark against which to judge performance.

---

### Question #8 of 32

Question ID: 1459068

Which of the following statements is *most accurate* about integrating ESG considerations into portfolio planning and construction?

- Investors who engage in active ownership to pursue their ESG considerations
  - A)** should vote their shares themselves rather than delegating share voting to an investment manager.
  - B)** A broad market index is an inappropriate benchmark for a portfolio that uses negative screening to address the investor's ESG concerns.
  - C)** Integrating ESG considerations into portfolio planning and construction is likely to decrease portfolio returns.
- 

### Question #9 of 32

Question ID: 1459062

When developing the strategic asset allocation in an IPS, the correlations of returns:

- A)** among asset classes should be relatively high.
  - B)** within an asset class should be relatively high.
  - C)** within an asset class should be relatively low.
- 

### Question #10 of 32

Question ID: 1459053

Which of the following should *least likely* be included as a constraint in an investment policy statement (IPS)?

- A)** Any unique needs or preferences an investor may have.
  - B)** How funds are spent after being withdrawn from the portfolio.
  - C)** Constraints put on investment activities by regulatory agencies.
- 

### Question #11 of 32

Question ID: 1459061

Which of the following asset class specifications is *most appropriate* for asset allocation purposes?

- A)** Consumer discretionary.
  - B)** Emerging markets.
  - C)** Domestic bonds.
- 

### Question #12 of 32

Question ID: 1459063

When performing strategic asset allocation, properly defined and specified asset classes should:

- A)** approximate the investor's total investable universe as a group.
  - B)** each contain assets that have a broad range of risk and expected return.
  - C)** have high returns correlations with other asset classes.
- 

### Question #13 of 32

Question ID: 1459052

Which of the following statements about investment constraints is *least accurate*?

- A)** Diversification efforts can increase tax liability.
  - B)** Investors concerned about time horizon are not likely to worry about liquidity.
  - C)** Unwillingness to invest in gambling stocks is a constraint.
- 

### Question #14 of 32

Question ID: 1459046

Which of the following statements about risk is NOT correct? Generally, greater:

- A)** existing wealth allows for greater risk.
  - B)** insurance coverage allows for greater risk.
  - C)** spending needs allows for greater risk.
-

### Question #15 of 32

Question ID: 1459057

An endowment is required by statute to pay out a minimum percentage of its asset value each period to its beneficiaries. This investment constraint is *best* classified as:

- A) legal and regulatory.
  - B) liquidity.
  - C) unique circumstances.
- 

### Question #16 of 32

Question ID: 1459048

While assessing an investor's risk tolerance, a financial adviser is *least likely* to ask which of the following questions?

- A) "How much insurance coverage do you have?"
  - B) "Is your home life stable?"
  - C) "What rate of investment return do you expect?"
- 

### Question #17 of 32

Question ID: 1459058

Davis Samuel, CFA, is meeting with one of his portfolio management clients, Joseph Pope, to discuss Pope's investment constraints. Samuel has established that:

- Pope plans to retire from his job as a bond salesman in 17 years, after which this portfolio will be his primary source of income.
- Pope has sufficient cash available that he will not need this portfolio to generate cash outflows until he retires.
- Pope, as a registered securities representative, is required to have Samuel send a copy of his account statements to the compliance officer at Pope's employer.
- Pope opposes certain policies of the government of Lower Pannonia and does not wish to own any securities of companies that do business with its regime.

To complete his assessment of Pope's investment constraints, Samuel still needs to inquire about Pope's:

- A) unique circumstances.

- B)** tax concerns.
  - C)** liquidity needs.
- 

### Question #18 of 32

Question ID: 1459037

Which of the following is NOT a rationale for the importance of the policy statement in investing? It:

- A)** identifies specific stocks the investor may wish to purchase.
  - B)** forces investors to understand their needs and constraints.
  - C)** helps investors understand the risks and costs of investing.
- 

### Question #19 of 32

Question ID: 1459039

Brian Nebrik, CFA, meets with a new investment management client. They compose a statement that defines each of their responsibilities concerning this account and choose a benchmark index with which to evaluate the account's performance. Which of these items should be included in the client's Investment Policy Statement (IPS)?

- A)** Only one of these items.
  - B)** Both of these items.
  - C)** Neither of these items.
- 

### Question #20 of 32

Question ID: 1459064

An investment manager has constructed an efficient frontier based on a client's investable asset classes. The strategic asset allocation for the client should be the asset allocation of one of these efficient portfolios, selected based on:

- A)** the client's investment objectives and constraints.
- B)** the relative valuations of the investable asset classes.
- C)** a risk budgeting process.

---

**Question #21 of 32**

Question ID: 1459044

A return objective is said to be relative if the objective is:

- A)** compared to a specific numerical outcome.
  - B)** stated in terms of probability.
  - C)** based on a benchmark index or portfolio.
- 

**Question #22 of 32**

Question ID: 1459067

An investment manager is *most likely* to be engaging in tactical asset allocation if she:

- A)** allocates 5% to cash, 20% to fixed income, and 75% to equities based on the investor's long time horizon and high risk tolerance.
  - B)** allocates more than the targeted 10% to emerging market bonds because the sector appears to be undervalued.
  - C)** increases the allocation to tax-free bonds because the investor's effective tax rate has increased.
- 

**Question #23 of 32**

Question ID: 1459049

All of the following affect an investor's risk tolerance EXCEPT:

- A)** years of experience with investing in the markets.
  - B)** tax bracket.
  - C)** family situation.
- 

**Question #24 of 32**

Question ID: 1459060

When preparing a strategic asset allocation, how should asset classes be defined with respect to the correlations of returns among the securities in each asset class?

- A) High correlation within asset classes and low correlation between asset classes.
  - B) Low correlation within asset classes and low correlation between asset classes.
  - C) Low correlation within asset classes and high correlation between asset classes.
- 

### Question #25 of 32

Question ID: 1459065

A portfolio manager who believes equity securities are overvalued in the short term reduces the weight of equities in her portfolio to 35% from its longer-term target weight of 40%. This decision is *best* described as an example of:

- A) rebalancing.
  - B) strategic asset allocation.
  - C) tactical asset allocation.
- 

### Question #26 of 32

Question ID: 1459056

An individual investor specifies to her investment advisor that her portfolio must produce a minimum amount of cash each period. This investment constraint is *best* classified as:

- A) legal and regulatory.
  - B) liquidity.
  - C) unique circumstances.
- 

### Question #27 of 32

Question ID: 1459054

Categories of investment constraints in an investment policy statement *least likely* include:

- A) liquidity needs.
  - B) tax concerns.
  - C) risk tolerance.
-

### Question #28 of 32

Question ID: 1459042

Which of the following statements about the importance of risk and return in the investment objective is *least* accurate?

- A) The return objective may be stated in dollar amounts even if the risk objective is stated in percentages.
  - B) The investor's risk tolerance is likely to determine what level of return will be feasible.
  - C) Expressing investment goals in terms of risk is more appropriate than expressing goals in terms of return.
- 

### Question #29 of 32

Question ID: 1462977

Which of the following portfolio constraints in the Investment Policy Statement of a local college's endowment *most likely* belongs in the "unique circumstances" category? The endowment is:

- A) exempt from taxes.
  - B) subject to oversight by a regulatory authority.
  - C) unwilling to invest in companies that sell weapons.
- 

### Question #30 of 32

Question ID: 1459055

Which of the following is *least likely* to be considered a constraint when preparing an investment policy statement?

- A) Liquidity needs.
  - B) Risk tolerance.
  - C) Tax concerns.
- 

### Question #31 of 32

Question ID: 1459047

Which of the following statements is NOT consistent with the assumption that individuals are risk averse with their investment portfolios?

- A)** Many individuals purchase lottery tickets.
  - B)** Higher betas are associated with higher expected returns.
  - C)** There is a positive relationship between expected returns and expected risk.
- 

### Question #32 of 32

Question ID: 1462976

Based on a questionnaire about investment risk, an advisor concludes that an investor's risk tolerance is high, but based on an analysis of the client's income needs and time horizon, he concludes the investor's risk tolerance is low. The *most appropriate* action for the advisor is to:

- A)** emphasize stocks over bonds.
- B)** emphasize bonds over stocks.
- C)** educate the client about investment risk and re-administer the questionnaire.
